

Full Stack Developer

Clear Books - London

About Clear Books

Clear Books provides clear and simple cloud accounting and payroll software for businesses and accountants.

Over the past ten years, we've built a small, tight knit team that feels like family. With a well defined strategy, a focus on growth, and the ambition to innovate and constantly improve our product, Clear Books is a great environment for developers who enjoy variety and learning new skills.

The role

In order to achieve our big ambitions we are recruiting another Full Stack Developer to join our cross-functional development team. The right candidate will place importance on teamwork and solving real world customer problems with innovative technical solutions.

With the help of your team, you will be developing, testing, and deploying our cloud accounting and payroll software using agile best practices. You will contribute to user experience design, technical design, write quality code and maintain our cloud based infrastructure.

Responsibilities

- Deliver high quality code using modern standards and best practices
- Work closely with colleagues across various areas of the business
- Write behavior tests and unit tests
- Participate in improving our continuous integration workflow
- Contribute to our technical architecture and vision
- Share your knowledge and learn from the rest of the team

Required Skills

- A well organised, self motivated, critical thinker
- Experience writing object oriented PHP
- Experience using PHP based application frameworks such as Symfony
- Experience writing well formed unit tests and functional tests
- Proficient with Git and Github version control
- Understanding of agile methodologies, preferably SCRUM

Bonus points

- Experience building RESTful APIs
- Experience working with Node.js frameworks such as Express.js or similar
- Experience with AngularJS or similar (React, Vue)
- DevOps experience. Specifically AWS, Docker, Jenkins
- Exposure to accounting and/or payroll systems

What we offer

- Competitive salary
- Light lunches, snacks, and stocked fridges
- Friday drinks, pool table, Xbox, Wii
- Casual dress code
- Good transport links, secure bike parking and showers
- Working in a young, supportive team environment
- Opportunities to learn new programming languages and technologies
- Being part of a company with passion, drive and where every idea is considered
- The chance to be part of a company with over 10,000 customers, with plans to serve over 40,000
